& Associates, Inc.*

Why Dental Expressions?

Dental Expressions is proud to be a mercury-free practice. Since 1986, we have provided esthetic porcelain, ceramic and resin alternatives to the use of mercury amalgam and other metals. We offer these procedures to enhance biocompatibility as well as overall esthetics.

A beautiful smile can make all the difference in your life. The Dental Expressions team brings skill and experience to enhance your quality of life, health and self-image. We provide the most current, high quality, esthetic dentistry possible, tailored to your needs and values. For over 20 years, our use of the CEREC system has revolutionized the way we deliver care to our clients.

This high-tech equipment allows us to offer beautiful, strong, naturally colored restorations in about an hour. These same-day, permanent porcelain inlays, onlays, crowns and veneers can transform your smile. Most often there are no impressions to go to an outside lab, no temporaries and no repeat visits. Best of all, the procedures may be much more conservative, preserving more of your natural tooth structure.

We gladly accept new patients and welcome children 3 years and up. Our Registered Dental Hygienists bring over 40 years of care and experience to afford you the best in periodontal treatment tailored to your individual needs.

What you can expect

- Your experience will generally begin with a comprehensive oral examination including necessary x-rays, cancer screening, periodontal screening and in some cases, photographs and study models.**

We will evaluate the current health of your mouth, offer a “Smile Analysis”, and evaluate areas of concern or need. Together, we will then discuss your needs and desires and formulate a plan specific to you.

Benefits and risks of treatment or delay of treatment will be addressed to give you the best tools to help you make the right decisions for your care.

Invisalign

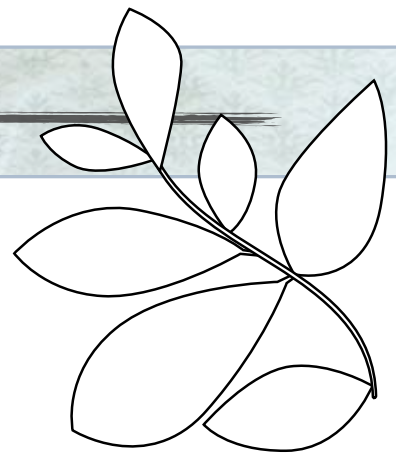

Dental Expressions offers smile and tooth alignment using the clear alternative to braces, Invisalign. Unlike braces, there are no metal brackets or wires that could cause irritation in your mouth.

Nancy had been tolerating her extremely misaligned teeth for many years but did not want to be treated with unsightly traditional braces.

Invisalign care followed by 2 veneers created her beautiful newsmile. Thrilled with her new look, she is no longer reluctant to show her smile!

For Your Comfort

Your comfort in our office is one of our main concerns. We are aware that many people do not look forward to dental visits. Therefore, we have taken extra steps in designing our practice to provide a relaxing, warm and inviting environment for our clients. We have also created a complete "Comfort Menu" of amenities to help ensure an enjoyable visit. Browse through the menu and if there is anything we can do to make you more comfortable, please ask. We want to change the way you feel about "a trip to the dentist".

Smile Gallery

Keandre completed traditional orthodontic treatment but he was left with spaces between his pointed and narrow teeth.

Custom CEREC Veneers were bonded to each of the pointed teeth. In one visit, the Veneers changed the shape and color, matching the rest of his teeth, and completed his "Perfect Smile".

Nicole wanted a second opinion after being diagnosed for several traditional crowns. Defective mercury amalgam fillings were present and she did not want to lose more of her tooth to make crowns.

Using CEREC Inlay and Onlay restorations, more tooth was saved and the teeth were restored with porcelain to "like new" condition. She achieved her result in just one visit!

Kristin wanted to whiten and lengthen her teeth. A worn and uneven smile resulted from grinding before her orthodontic care.

Eight CEREC porcelain veneers were custom detailed with characterization to brighten and enhance the natural look of her smile. All in just one visit!
